

IDentity Windshield Mount Tag, Transferrable

Ultra High Frequency 865 - 928 MHz
Global Passive Transponder

Overview

The IDentity Transferrable Windshield Mount Tag is a high performance radio frequency (RF) transponder designed to be used in conjunction with Sirit's IDentity series reader systems for automatic vehicle identification applications.

Developed for vehicle identification solutions which require the tag to be mounted on a glass surface, such as a vehicle windshield, each transponder is capable of read/write functionality, contains a unique identification code, and is powered by utilizing energy from the reader, eliminating the requirement for a battery. The windshield transponder has a compact, transferrable form factor so as not to hinder the driver's view, while offering the ability to transfer the tag between vehicles.

The IDentity series tag and reader solution is ideally suited for a number of global transportation applications including Electronic Vehicle Registration (EVR), vehicle emissions testing, proof of insurance compliance, electronic tolling and Parking & Access Control (PACS). By eliminating the manual, visual-based inspection associated with current systems the Sirit solution enables system operators to securely identify vehicles with appropriate authorizations from a distance, while the vehicle is in motion.

Security & Authentication

Sirit's "Secure Reader" and "Secure Tag" technologies offer multiple levels of security and authentication options. These options provide authentication techniques for the transponder. In addition, Sirit provides "RF" security features that verify the authenticity of a transponder during communications with the reader and provide security of sensitive information that may be stored on the tag.

Identity Windshield Mount Tag

865 - 928 MHz Global, Passive Transponders

Performance Characteristics

Operating Frequency:	902 - 928 MHz Americas, 4 W EIRP 869.4 - 869.56 MHz Europe, 0.5 W ERP 865.6 - 867.6 MHz Europe, 2 W ERP
Supported Protocol:	ISO 18000-6C
Data Transfer Rate:	Up to 640 kbps

Physical Characteristics

Dimensions (LxW):	155.4 x 20.32 mm (6.12 x 0.8 in.)
Weight:	10 g (0.353 oz)

Environment

ESD Voltage Immunity:	+/- 3kV
Operating Temperature:	-40°C to +85°C (-40°F to 185°F)
Storage Temperature:	-40°C to +100°C (-40°F to 212°F)
Relative Humidity:	30% - 70%

Tag Memory & Security

Tag Part Numbers	ID-WMT-TR-L1S	ID-WMT-TR-L3S
On-Chip Memory:	752 bits	800 bits
Tag Identifier:	64 bits	64 bits
Access password:	32 bits	32 bits
Kill password:	32 bits	32 bits
EEPROM data retention:	10 years	10 years
EEPROM write endurance:	100,000 cycles	100,000 cycles
Unique TID	Yes	Yes
Password Authentication	Yes	Yes
Read Lockable Memory	NO	Yes

About Sirit Inc.

Sirit Inc. is a leading provider of Radio Frequency Identification (RFID) reader technology to OEMs and solution providers worldwide. Harnessing the power of Sirit's enabling-RFID technology, customers are able to more rapidly bring high quality RFID solutions to the market with reduced initial engineering costs. Sirit's products are built years of RF domain expertise addressing multiple frequencies (LF/HF/UHF), multiple protocols and are compliant with global standards. Sirit's broad portfolio of products and capabilities are easily customized to address new and traditional RFID market applications including Supply Chain & Logistics, Cashless Payment, Access Control, Automatic Vehicle Identification, Inventory Control & Management, Asset Tracking and Product Authentication.
