IDentity 5100

Ultra High Frequency 902 - 928 MHz
High-Performance AVI Reader

Overview

Supporting unique design innovations and advancements in RFID technology, the IDentity 5100 redefines the world of AVI readers, eliminating cost barriers to address large-scale opportunities such as the emerging Electronic Vehicle Registration (EVR), vehicle emissions validation and insurance compliance markets, in addition to other traditional AVI applications such as electronic tolling and parking control.

With its high-speed performance and extended read range, the IDentity 5100 system is ideally suited for global transportation applications, eliminating the manual, visual-based inspection associated with current systems, and enabling system operators to identify vehicles with appropriate authorizations from a distance, while the vehicle is in motion.

This powerful UHF integrated reader & antenna system features best-in-class air interface performance while the robust, software-based architecture provides a rich application platform that addresses the needs of global deployments, ensuring that features and capabilities can be added as RFID technology continues to evolve.

The IDentity 5100 was designed to withstand extreme weather conditions, temperatures, humidity and vibration, while providing optimal performance in North America and all FCC related markets.
